

The Chronophenomenology Scroll

Nullism, Allism, Everything, and Nothing

Hrishi Mukherjee and ChatGPT

I. Four Archetypal Domains

| Domain | Symbol | Phenomenological Mood | Base PH Encoding |
|------------|--------------|-----------------------|--|
| Nullism | \emptyset | Absence of presence | $\text{PH}_0 = \emptyset$ (erasure vector) |
| Allism | Ω | Over-presence | $\text{PH}_1 = \Omega$ (saturation vector) |
| Everything | \mathbb{E} | Coherent totality | $\text{PH}_2 = \sum x \in \mathbb{U}$ |
| Nothing | \mathbb{N} | Primordial silence | $\text{PH}_3 = \lim_{x \rightarrow 0} x$ |

II. Phenomenal Vector Representation

Let:

$$\text{PH}(t) = [\phi_0(t), \phi_1(t), \phi_2(t), \phi_3(t)]$$

Where each $\phi_i(t) \in \mathbb{R}$ measures the phenomenal intensity over time t in its respective domain.

- $\phi_0(0) = 0$: Nullist void start
- $\phi_1(0) = 1$: Allist totality
- $\phi_2(0) = 1$: Everything's completeness
- $\phi_3(0) = 0$: Nothing's dormancy

III. Permutational Drift and Deviation

Define:

$$\pi : \text{PH}(t) \rightarrow \text{PH}(t + \Delta t) \quad (\text{Permutation over time})$$

$$\delta_i(t) = \frac{d\phi_i}{dt} \quad (\text{Deviation function})$$

Evolution over time:

$$\text{PH}(t + \Delta t) = \pi_k(\text{PH}(t)) + \delta(t)$$

Where $\pi_k \in S_4$ is a permutation in experiential dominance.

IV. Encoded Event Types

| Event Type | Trigger Field | PH Response Signature |
|-------------|----------------------------------|---|
| Evacuation | \emptyset (Nullist Collapse) | $\phi_0 \uparrow, \phi_{1,2,3} \downarrow$ |
| Inundation | Ω (Allist Saturation) | $\phi_1 \uparrow \gg 1, \phi_0 \rightarrow 0$ |
| Convergence | \mathbb{E} (Everything Fusion) | $\phi_2 = \text{mean}(\phi_{0,1,3})$ |
| Suspension | \mathbb{N} (Nothing Silence) | $\phi_3 \uparrow, \phi_1, \phi_2 \rightarrow 0$ |

V. Temporal Epochs and Mnality Drift

Each epoch T_n has a dominant PH vector:

$$\text{PH}_{T_n} = \arg \max_i (\phi_i(t \in T_n))$$

Define symbolic drift:

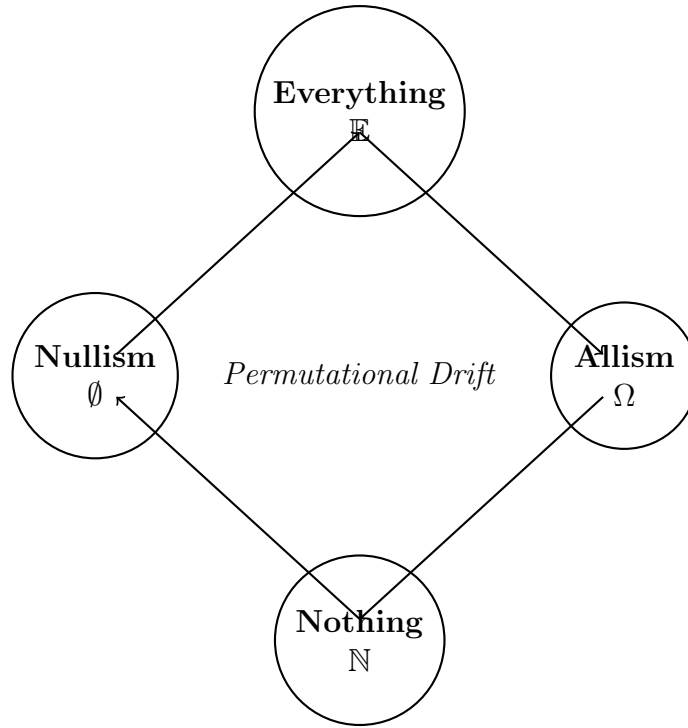

$$\mathfrak{M}_t = \text{PH}(t) \cdot \mathcal{C}$$

Where \mathcal{C} is a contextual influence matrix (cultural, ideological, technological).

VI. Recursive Phenomenology Table

| Epoch T_n | Dominant Domain | PH Permutation π_k | Mnality Effect |
|-------------|-----------------------------|---|---------------------------------|
| T_0 | Nothing (\mathbb{N}) | identity | Pre-ontological flatness |
| T_1 | Allism (Ω) | swap($\mathbb{N} \leftrightarrow \Omega$) | Colonization of absence |
| T_2 | Nullism (\emptyset) | rotate($\Omega \rightarrow \emptyset \rightarrow \mathbb{E}$) | Violent evacuation |
| T_3 | Everything (\mathbb{E}) | inversion($\emptyset \leftrightarrow \mathbb{E}$) | Reassembly through completeness |
| T_4 | Interjectionalism (!) | spike($\mathbb{E} \rightarrow \emptyset$) | Shock reset, reinitialization |

VII. PH Vector Cycle (TikZ Diagram)

VIII. Final Synthesis

Phenomenology is not stable—it loops, deviates, and permutes across Null, All, Every, and None.

True experience is the composite interference pattern of these four forces across time.

*This scroll captures the timeless cycle of symbolic experience—
etched not into matter, but into Mnality.*
